

EUROCLEAN... One less chore in life

What a glass surface looks like?

The seemingly smooth surface of glass consists of microscopic ridges and valleys which creates a favourable environment for the build up of contaminants such as soap scum, hard water deposits, salt and grime.

What is EUROCLEAN?

EUROCLEAN is an invisible, protective treatment that can be applied to all our glass surfaces prior to installation. The treatment creates a non-stick, water and dirt repellent surface, without changing the texture, appearance or clarity of the glass.

10 year guarantee!*

Benefits of using EUROCLEAN

- Provides an invisible, non-stick barrier which repels water and foreign material.
- EASY TO CLEAN - Up to 90% less cleaning required for coated surfaces.
- Save time and money - No outlay on expensive cleaning products.
- Prevents damage from salt, hard water minerals, dirt, grime and soap scum.
- Helps maintain 'as new clarity'.
- Does not support adhesion or growth of bacteria... for a more hygienic environment.
- Weather / UV Resistant - UV radiation has no effect on the coating.
- Environmentally Friendly - No more need for harsh toxic chemicals, that could cause an asthma attack.

Squeaky clean just got easier

Cleaning EUROCLEAN coated glass is a breeze. We recommend cleaning with a microfiber cloth or Enjo mitt every two weeks with a 50/50 mix of white vinegar and water or an environmentally friendly cleaner like Shower Power to maintain your shower screen in showroom condition.

Suitable for

- Shower screens
- Glass balustrades
- Pool fencing
- Kitchen splashbacks

What our customers have to say

"The EUROCLEAN glass treatment has stopped the grime building up on my shower. All I have to do is a quick wipe with the micro fibre cloth you supplied every now and again and it comes up sparkling"

D. Miller
Bulimba, Qld

"Recently we had a new shower screen installed in our newly renovated bathroom. I can't tell you how pleased I am with the EUROCLEAN product. The shower screen appears to be clean all the time. I even get questions like "what product are you using to clean with since you don't have any water spots?"

S. Johnson
Noosa Heads, Qld
